FOR IMMEDIATE RELEASE

**AVIPROTEK® BIRD FRIENDLY PRODUCTS
TESTED POSITIVE BY THE AMERICAN BIRD CONSERVANCY**

Montreal, September 27 2016 – **Walker Textures®** is proud to release results of tests performed by the American Bird Conservancy (ABC) on three **Avirotek®** patterned acid-etched glass products.

The three **Avirotek®** standard patterns when used on the outside surface of the glass have effective threat factors which contribute to collision avoidance on buildings 70 to 77 % of the time. Based on these results, patterns 211, 213 and 214 of the **Avirotek®** are deemed effective by ABC. Furthermore, full surface acid-etched glass is also an effective bird friendly solution with a threat factor of 5 when used on position 1 and of 25 on position 2.

“With these new results, the **Avirotek®** line offers effective and exciting solutions for those involved in bird friendly projects. These standard patterns can also be used with the **Avirotek® E** which combines the Solarban® high performance low-e coatings on position 2 with the acid-etched visual markers on position 1. Also, the **Walker Textures®** acid-etched glass products are covered by a 10-year warranty on surface degradation.” says Marc Deschamps, Business Development Manager.

To order your samples or for more information regarding our bird friendly solutions, please visit our web site at: <http://walkerglass.com/products/aviprotek-bird-friendly-glass/>

Walker will be exhibiting its bird friendly acid-etched glass products during the upcoming **Greenbuild** show at booth **2735** and **GlassBuild** at booth **844**.

Your **Domestic Source** for Acid-etched Glass and Mirror

9551 Ray Lawson Blvd., Montreal (Quebec) H1J 1L5 · Fax: (514) 351-3010

Walker Glass Co. Ltd. is a dynamic market-driven enterprise with over 70 years of experience in the glass and mirror industry in North America. Innovation and creativity are at the heart of its development. In 2002, the company launched a full surface acid-etched glass and mirror product line under the **Walker Textures®** brand name. Since then, the company has added a line of custom and stock patterns, **Walker Textures® Nuance** and a line of anti-slip acid-etched glass products, **Walker Textures® Traction**. Furthermore, Walker offers three bird friendly glass solutions: **AviProtek®**, **AviProtek® E***, **AviProtek® T**. And finally, **Walker Textures® Transition** is the custom solution for gradient effects on acid-etched glass.

**AviProtek® E is available with Solarban®60 VT, Solarban®67 VT and Solarban®70XL VT glasses by PPG
Solarban and PPG are trademarks of PPG Industries Ohio, Inc.*
