**FOR IMMEDIATE RELEASE**

## TERRITORY EXPANSION FOR STEVE MORREN

Montreal, April 12, 2016 – Walker Glass is proud to announce the expansion of Steve Morren’s territory to include the Western Canadian provinces. Steve will continue to promote Walker Textures® products to architects, designers, specification writers and contract glaziers in Ontario as well as continuing to be responsible for developing and promoting our programs to OEM companies across Canada and USA.

Morren joined Walker two years ago. With his knowledge of the Ontario market his impact was immediate on various projects including some that required bird friendly glass. Before joining Walker, Morren had over 35 years’ experience in the glass industry. He started his career in 1978 with PPG Industries, then with Walker Atlantic, Fulton Windows, Eastern Float glass and Saand in Toronto.

“It was a natural for us to expand Steve’s territory to the Western Canadian Provinces. We have noticed increased demand for our products and solutions from architects and designers in this region. Steve has been successful in creating the necessary links between the various players that are involved in each project. Architects, designers, glaziers and our clients in these markets will benefit from his knowledge and expertise.” says Marc Deschamps, Business Development Manager.

Walker Glass Co. Ltd. is a dynamic market-driven enterprise with over 70 years of experience in the glass and mirror industry in North America. Innovation and creativity are at the heart of its development. In 2002, the company launched a full surface acid-etched glass and mirror product line under the **Walker Textures®** brand name. Since then, the company has added a line of custom and stock patterns, **Walker Textures® Nuance** and a line of anti-slip acid-etched glass products, **Walker Textures® Traction**. Furthermore, Walker offers three bird friendly glass solutions: **AviProtek®**, **AviProtek® E\***, **AviProtek® T**. And finally, **Walker Textures® Transition** is the custom solution for gradient effects on acid-etched glass.

*\*AviProtek® E is available with Solarban®60 VT, Solarban®67 VT and Solarban®70XL VT glasses by PPG*
