Montreal (Quebec) H1J 1L5  
Canada

**FOR IMMEDIATE RELEASE**

**WALKER GLASS  
STRENGTHENS ITS  
COMMITMENT TO SUSTAINABLE DESIGN**

Montreal, November 7, 2017 – **Walker Glass** is proud to be the first to publish a third-party-verified environmental product declaration on acid-etched glass, acid-etched mirror and unetched mirror.

**Walker Glass** has earned Type III Environmental Product Declaration (EPD) verification and registration in conformance with certification requirements of ISO standard 14025:2006. The company has also published a third-party verified Health Product Declaration® (HPD®) on acid-etched glass and mirror products based on Health Product Declaration® Collaborative standards.

“We are committed to support appropriate and effective sustainable design practices. We recognize that architects, designers, building owners and specifiers need to make informed selection decisions with independently verified environmental data on our products.” said *Steve Morren, Architectural Program Director*.

Under the LEED v4 program both EPD and HPD® declarations also help building owners earn points under the Materials and Resources category for Building Product Disclosure and Optimization. They can also contribute to other green building evaluation systems such as WELL, Green Globes and BREEAM.

In an effort to best inform interested parties **Walker Glass** has also published Environmental Data Sheets that consolidate into one document all product environmental attributes, declarations and certifications.

“**Walker Glass** is fully committed to the diligent protection of both the environment and the health and safety of its workers and its customers’ workers. Our research and development process strives to create architectural products that have a sustainable impact on buildings and its occupants. This commitment is one of transparency regarding our practice and selection of materials.” said *Marc Deschamps, Business Development Manager*.

Walker Glass Company Ltd. is a dynamic market-driven enterprise with over 75 years of experience in the glass and mirror industry in North America. Innovation and creativity are at the heart of its development. In 2002, the company launched a full surface acid-etched glass and mirror product line under the **Walker Textures®** brand name. Since then, the company has added a line of custom and stock patterns, **Walker Textures® Nuance** and a line of anti-slip acid-etched glass products, **Walker Textures® Traction**. Furthermore, Walker offers three bird friendly glass solutions: **AviProtek®**, **AviProtek® E\***, **AviProtek® T**. And finally, **Walker Textures® Transition** is the custom solution for gradient effects on acid-etched glass.

*\*AviProtek® E is available with Solarban®60 VT and Solarban®70XL VT glasses by Vitro Glass*
