PRESS RELEASE

**GREATER FLEXIBILITY AND SHORTER LEAD TIMES WITH
THE NEW ACID-ETCHED GLASS FINISH "VELOUR"**

Montreal, July 9, 2007 – With the launch of the new acid-etched glass finish, Velour, Walker Glass offers greater size flexibility and shorter lead times to its clientele. This new finish will provide fabricators, architects, designers and project managers another acid-etch opacity to work with.

Ross Christie V-P Sales & Marketing says " The greatest advantage to Velour is the flexibility in sizes we now offer. We can etch from 60" x 100" all the way up to 100" x 144"; so our fabricators cutting optimization is greatly increased. Another key benefit is that our new capacity allows for immediate shipping."

Like the rest of the **Walker Textures™** product line, the Velour finish is available in a wide variety of colours: clear, bronze, grey, black, green, blue and ultra-clear. Another advantage is the range of thickness which goes from 3 MM to 19 MM, depending on glass tint.

Additional information on the Velour products is available on the Walker Glass web site, as well as our white paper entitled "The Top Five Issues to Consider when Writing Acid-etched Glass or Mirror Specifications". It discusses issues important to the success of projects involving acid-etched glass or mirror. To get a free copy of the white paper and complete information on our acid-etched glass products visit the Walker Glass web site at www.walkerglass.com.

Walker Glass Co. Ltd. is a dynamic company with over 65 years experience in the glass industry in North America. In 2003, the company started up a full surface acid-etched glass and mirror manufacturing plant. It remains the only such plant in North America dedicated to the architectural glass market. Acid-etched products are marketed under the **Walker Textures™** brand name.
