FOR IMMEDIATE RELEASE

PUSHING THE LIMITS...
WALKER GLASS AND PPG TEAM UP
TO LAUNCH LOW-E COATED ACID-ETCHED GLASS

Montreal, June 16, 2016 – **Walker Glass** and **PPG** are pushing the limits once again with the launch of low-e coated acid-etched glass.

Architects now have the choice to use **full surface** or patterned acid-etched finishes from **Walker Textures**® on surface 1 with three different **Solarban**® high performance coatings from PPG on surface 2. The combination of these two products offers the architectural community an opportunity to optimize design and solar performance objectives to achieve a truly unique glazing system.

“Walker Textures® surfaces offer excellent wear, stain and scratch resistance properties and provide exciting performance and functional elements such as high light transmittance, glare control, privacy and aesthetics with no significant impact on solar performance. Also, the **Walker Textures**® acid-etched glass products are covered by a 10-year warranty on surface degradation,” says Marc Deschamps, Business Development Manager.

“PPG is committed to supporting sustainable building practice, which is why we value this new opportunity to partner with **Walker Textures**®. The ability to unite **Solarban**® low-e glasses with Walker’s full range of acid-etched finishes, including bird-safe **AviProtek**® glass, expands the range of aesthetic and performance options available to architects for energy efficient, environmentally progressive glass.” says Glenn Miner, Director of Construction for PPG.

Walker Glass Co. Ltd. is a dynamic market-driven enterprise with over 70 years of experience in the glass and mirror industry in North America. Innovation and creativity are at the heart of its development. In 2002, the company launched a full surface acid-etched glass and mirror product line under the **Walker Textures®** brand name. Since then, the company has added a line of custom and stock patterns, **Walker Textures® Nuance** and a line of anti-slip acid-etched glass products, **Walker Textures® Traction**. Furthermore, Walker offers three bird friendly glass solutions: **AviProtek®**, **AviProtek® E***, **AviProtek® T**. And finally, **Walker Textures® Transition** is the custom solution for gradient effects on acid-etched glass.

**AviProtek® E is available with Solarban®60 VT, Solarban®67 VT and Solarban®70XL VT glasses by PPG*
