*WALKER TEXTURES™
EXPANDED EXTERIOR GLASS PROGRAM*

Montreal, June 23, 2014 – Walker Glass is proud to announce the expansion of its **Walker Textures™** exterior glass program, featuring a new **10 year warranty against surface degradation** and exciting properties that **reduce the need for artificial light and decrease energy consumption**.

A wide scope of tools and information on applications, functional and physical properties, light and energy performance, and much more is consolidated into this comprehensive program on the use of acid-etched glass in various exterior applications.

“After years of testing, we are very excited to share our findings. The usage of acid-etched glass in exterior applications keeps growing and it was time to create a package containing all the relevant information that architects, fabricators and contract glaziers are looking for. Our acid-etched glass products provide a level of visual quality and consistency as well as resistance to wear, staining and scratching equal or superior to unetched glass.” says *Ross Christie, VP Sales & Marketing*.

To learn more about the **Walker Textures™** exterior program, visit <http://walkerglass.com/services/exterior-applications-program/> or visit us at AIA Expo, Booth 2645.

Walker Glass Co. Ltd. is a dynamic market-driven enterprise with over 70 years of experience in the glass and mirror industry in North America. Innovation and creativity is at the heart of its development. In 2002, the company launched a full surface acid-etched glass and mirror product line under the **Walker Textures™** brand name. Since then, the company has added a line of custom and stock patterns, **Walker Textures™ Nuance**, a line of anti-slip acid-etched glass products, **Walker Textures™ Traction** and a line of bird friendly glass, **Walker Textures™ AviProtek**.
