WALKER GLASS RELEASES A NEW WHITE PAPER
ON ANTI-SLIP ACID-ETCHED GLASS

Montreal, April 13, 2012 – Walker Glass just released a new White Paper about the anti-slip acid-etched glass titled ***“What Specifiers Should Know About Acid-etched Glass for Walkways”***.

This White paper will be beneficial to inform architects, designers and structural engineers on the properties of anti-slip acid-etched glass. The White Paper discusses issues such as surface finish consistency, surface hardness, durability, and strength of the anti-slip glass which are critical in creating the desired design and to appropriately assess constructability.

“We feel this White Paper is a great tool to help architects, designers, and structural engineers understand the key differences between acid-etched glass and fritted glass in achieving an anti-slip surface.” says Ross Christie, V-P Sales & Marketing.

To download a copy of the white paper ***“What Specifiers Should Know About Acid-etched Glass for Walkways”***, go to: <http://walkerglass.com/products/anti-slip-glass/>

Walker Glass Co. Ltd. is a dynamic market-driven enterprise with 70 years of experience in the glass and mirror industry in North America. Innovation and creativity is at the heart of its development. In 2002, the company launched a full surface acid-etched glass and mirror product line under the ***Walker Textures™*** brand name. Since then, the company has added a line of custom and stock patterns called ***Walker Textures™ Nuance*** as well as an anti-slip acid-etched glass called ***Walker Textures™ Traction***.
