FOR IMMEDIATE RELEASE

THERE ARE TWO SIDES TO EVERY STORY...
INTRODUCING DOUBLE SIDED ACID-ETCHED GLASS

Montreal, April 16, 2010 – This year's AIA show will feature Walker Glass' line of patterned acid-etched glass and mirror along with its new double sided etched glass.

The **Walker Textures Nuance** program includes 5 stock patterns available in two different series giving 10 distinctive looks. The 100 series combines the Velour and Satin finishes giving a sense of privacy. The 300 series is the Satin finish on clear glass which provides greater visibility while adding a touch of design to the glass. Also part of the Nuance program is custom capabilities where virtually any pattern can be made resulting in a high level of registration and an unmatched level of detail.

Walker is promoting its double sided acid-etched glass. In addition to the three existing finishes, Opaque, Velour and Satin, Walker offers Satin/Satin and Opaque/Opaque now providing five different shades of full surface etching. On special orders the double sided can be made out of a combination of full sheet etching on one side and an acid-etch pattern on the other. This is another great example of the flexibility of the Walker Textures offerings.

Using North American glass substrates the **Walker Textures** products are available in a wide range of thicknesses varying from 3mm to 19mm on glass and 3mm to 6mm on mirror, in sizes up to 100"x144". Some products are offered in quantities less than 4,000 pounds. Visit our website at <http://www.walkerglass.com>
